Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: Paragraph 28, line 21 of the specification has a blank that needs to be filled in with an Application Serial Number.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation in claims 1, 13 and 21 of "wherein each port is adapted to receive a removable flow restriction plug" is vague and indefinite as to whether a "removable flow restriction plug" is being claimed as a structural limitation of the mixing apparatus.

Furthermore, the recitation in claim 17 of "the receiving chamber and cartridge" lacks antecedent basis because a cartridge was not previously claimed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Arnaud who discloses a contaminated liquid mixing apparatus comprising: a reactor head including a liquid inlet and a receiving chamber in fluid communication with the inlet; a gas injection port formed in the reactor head; a tube extending from the reactor head and in fluid communication therewith; a cartridge disposed within the receiving chamber having a plurality of ports in fluid communication with the receiving chamber. (Figs. 15-17; col. 11, line 63 to col. 9 line 63)

Claims 1-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Lecoffre et al. who discloses a contaminated liquid mixing apparatus comprising: a reactor head including a liquid inlet and a receiving chamber in fluid communication with the inlet; a gas injection port formed in the reactor head; a tube extending from the reactor head

and in fluid communication therewith; a cartridge disposed within the receiving chamber having a plurality of ports in fluid communication with the receiving chamber. (Figs. 5a-5b; col. 10, lines 24-60)

Claims 1-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Greene et al. who discloses a contaminated liquid mixing apparatus comprising: a reactor head including a liquid inlet and a receiving chamber in fluid communication with the inlet; a gas injection port formed in the reactor head; a tube extending from the reactor head and in fluid communication therewith; a cartridge disposed within the receiving chamber having a plurality of ports in fluid communication with the receiving chamber. (Figs. 2-6; col. 4, line 22 to col. 5, line 56)
